Everyday talking to people their topic is rising prices for everything.

The institute found that the people are correct.

In it's findings when comparing the September 15th basket of goods to the October 15th basket of goods the institute found there was a 4% inflation for the one month period which is significant.

Upon careful analysis, the institute found that provision went up by almost 45%, groceries rose by 1% and greens rose by 3% but meat remained unchanged.

The institute's next publication will be on November 15th 2023.
